Education

DOCTOR OF PHILOSOPHY | EST MAY 2029 | WASHINGTON STATE UNIVERSITY

- Research Topic: Performance Optimization for Data-Intensive Computing Systems.
- Advisor: Feng-hao Liu.

BACHELOR OF SCIENCE | JUNE 2024 | WASHINGTON STATE UNIVERSITY

- Major: Software Engineering.
- Awards:
 - Tau Beta Pi Membership Since December 2022.
 - Undergraduate Research Award, Spring 2024

BACHELOR'S DEGREE | JULY 2017 | SHAANXI UNIVERSITY OF TECHNOLOGY

- Major: Information and Computing Science (Computational Mathematics)
- Awards:
 - Chinese Collaging Computing Competition – Level 3 Award from 2015-2017 (with over 1000+ school teams around China, only 5% of them achieve level 3 or above).

Experience

TEACH ASSISTANT | WASHINGTON STATE UNIVERSITY | 2022- CURRENT.

- Provided grading and tutoring services for the following courses:
 - Software Engineering Principles (Cpts 322)
 - Calculus (Math 202)
 - Fundamentals of Cyber Security and Cryptography (Cpts 327)
 - Web Development (Cpts 489)

TEST ENGINEER | UBISOFT | DEC 2019 – AUG 2021

- Constructed automatic test workflows for 3+ projects over 2 years, eliminating the need for daily manual test cases. Achieved dynamic auto-test game object detection with a one-time success ratio of 64% and an overall case rate of 79.5%. Simulated real user environments for testing, including user keyboard and mouse signals.

Selected Previous Undergraduate Research Projects

- Previous Undergraduate Research Projects at Washington State University (Completed, 2022–2024):
- These projects focused on academic software testing and software reliability. They have concluded and are separate from my current PhD research. All related research artifacts, including data, publications, and source code, are publicly accessible.
 - Co-authored paper <VGX: Large-Scale Sample Generation for Boosting Learning-Based software vulnerability analyses> accepted by ICSE2024.
 - Co-authored paper <POLYFUZZ: Holistic Greybox Fuzzing of Multi-Language Systems> accepted by USENIX Security '23.
